2 Introduction

This document describes information for users of the [ADI LISTN EZ-AUDIO System](#) 1.0.0 release. For information regarding installation, system requirements and support please visit <http://analog.com/ev-21562-auto>.

3 System Requirements

- Windows 10 Pro (64-bit)
- 2 GHz single core processor, 3.3 GHz core or better recommended
- 4GB RAM; 8 GB or more recommended
- An available USB port

4 New and Noteworthy

This release provides software that supports the ADI LISTN EZ-AUDIO System. This product was designed to decrease time to market for customers looking for a full featured in-vehicle audio amplifier system. With full tuning capabilities and access to all HW files, the EZ-AUDIO System optimizes your time to audio.

5 Support

For technical support contact Analog Devices ADI LIST EZ-AUDIO System support at:
processor.tools.support@analog.com.

6 Known Issues

6.1 Uninstall

The uninstall should be done in 2 steps. First uninstall the ADI LISTN EZ-AUDIO System v1.0.0 and then uninstall AWE Tune ADI_ADSP 1.1.1.

6.2 Documentation

There are 2 documentation folders included in the installation. AWE Tune documentation can be found in the Documentation folder under AWE Tune-1.1.1. All other documentation can be found under the Docs folder in the root of the install.
